JOSE RUIZ

ruizdev7@outlook.com
500 866 813
Kostrzyn nad Odrą, Poland

Software Engineer with professional experience designing and developing full-stack web applications, backend services, REST APIs and business automation solutions. Experienced in Python, Flask, FastAPI, JavaScript, React, SQL databases, Docker and cloud-based deployments.

Strong background building enterprise applications, integrating business systems and developing reliable software solutions across the complete development lifecycle, including requirements analysis, implementation, testing support, deployment and maintenance.

Experienced working with database-driven applications, API integrations, automation workflows and modern software engineering practices. Passionate about building maintainable systems, improving processes and continuously learning new technologies.

EMPLOYMENT HISTORY

07.2022 – 06.2023 **Software Engineer** | Plena Global Holdings | Remote, Bogota DC, Colombia

- Developed and maintained web applications and backend services using Python, Flask and REST API principles.
- Designed database-driven solutions using SQL technologies, supporting business-critical accounting and operational workflows.
- Built frontend components and user interfaces using React, JavaScript and modern web development practices.
- Created Docker-based development and deployment environments improving consistency between development and production.
- Implemented automation workflows integrating ERP systems, APIs, databases and reporting platforms.
- Participated throughout the software lifecycle, including requirements analysis, development, deployment support and issue resolution.

01.2022 – 07.2022 **Systems Development Analyst (Internship)** | Plena Global Holdings | Remote, Bogota DC, Colombia

Supported software development, automation and operational technology initiatives.

Responsibilities:

- Developed SQL queries and optimized database operations.
- Supported API integrations between internal systems.
- Automated reporting workflows and repetitive operational processes.
- Processed and validated business data from multiple sources.
- Created Power BI dashboards for operational visibility.
- Assisted with software testing and deployment validation.

07.2015 – 04.2018 **Financial Systems Analyst** | Jorjweb LTDA | Bogota, Colombia

Supported implementation and maintenance of financial software platforms used by cooperative organizations and employee funds.

Responsibilities:

- Supported financial software implementations and system configuration activities.

- Developed knowledge of lending processes, portfolio management and financial operations.
- Performed software testing, validation and deployment support.
- Analyzed business requirements and translated operational needs into software solutions.
- Supported data quality processes, reconciliation and reporting activities.

Domain expertise:

Financial Systems
Credit Management
Portfolio Analysis
Banking Processes
Enterprise Software

07.2023 – present

Assembly Line Operator - Magna Lighting Poland | MAGNA LIGHTING KOSTRZYN spółka z ograniczoną odpowiedzialnością | Kostrzyn nad Odrą

While working in manufacturing after relocating to Poland, I have continued developing software projects, expanding my expertise in Python, FastAPI, React, Docker, AWS and AI-assisted development while preparing for my next software engineering role.

EDUCATION HISTORY

01.2020 – 01.2022

National Learning Service of Colombia | Analyst Development of Information Systems | zawodowe

SKILLS

Python | Claude Code | FastAPI | Flask | Django | API | SQLAlchemy | React | Vite | Tailwind CSS | Redux Toolkit Query | Docker | Docker Compose | CI/CD | Git - GitHub - GitHub Actions | Linux | AWS - GCP | Nginx | PostgreSQL | MySQL | GitHub Copilot | Prompt Engineering | AI-assisted Software Development | ETL | Database Migration

LANGUAGES

Polish elementary | English upper-intermediate | Spanish native
